<sup>1</sup> The \$50 million was pledged ahead of the "Haiti: Clean water, Improved sanitation, Better health" conference in October 2014. The funding will support a new water and sanitation project targeting high incidence zones for cholera over a five-year period.

<sup>2</sup> Canada's funding does not represent official pledges but contributions toward the national plan; it is included in pledge column in order to capture total pledge amount for tracking against the national plan.

<sup>3</sup> \$4,530,914 out of the \$5,793,847 was disbursed in 2015 as part of an ongoing public health project.

<sup>4</sup> Reflects support from the Centers for Disease Control and Prevention's one-time Congressional funding now being utilized. As shown in the table above, approximately \$12.4 million of CDC funds are being disbursed during 2013-2015. This funding is part of the more than \$95 million U.S. contribution for cholera control and prevention and does not include bilateral funds to strengthen health system in support of cholera control.
